

YEEZY by KANYE

New Release Yeezy's

Kanye West and Adidas met up in 2013 and decided to put fashion on a new level. When people heard that they teamed up, the sneaker world stood still in anticipation of what was to come. They created shoes called Yeezy's. Even though Adidas and Kanye met in 2013, these shoes were not released until 2015. The Boost line has since yielded instantly recognizable and classic profiles that boast the

same high level of taste and refinement that we've come to expect from his music. Every few months a new pair of Yeezy's are announced to come out. The price range for these shoes array from around \$500 to about \$3000. If you are one of the lucky one's to get them early you can purchase them from \$150 to \$300. So far the most popular Yeezy's are the Yeezy Boost 250's and Yeezy Boost 750's.

On December 17th, 2016 the new Yeezy Boost 350 v2 Black and White pair will drop and the shoes will sell out in minutes. You will not want to miss out on purchasing these shoes when they release on December 17th because no other shoe line will release a shoe as classy and as comfortable as these, for years to come. Visit <http://www.adidas.com/yeezy> to purchase today!
